SIR M. VISVESVARAYA INSTITUTE OF TECHNOLOGY
BENGALURU - 562157

PROGRAMME OUTCOMES (POs)

- Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/Development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The Engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for, sustainable development.
- Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and Team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multi-disciplinary settings.
- Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance:** Demonstrate knowledge and understanding of the Engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multi-disciplinary environments.
- Life - long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

SIR M. VISVESVARAYA INSTITUTE OF TECHNOLOGY
Kotahadvarayanagar, Hanasamarahalli, Off International Airport Road, Bengaluru - 562157
Affiliated to Visvesvaraya Technological University, Belagavi, Recognized by AICTE & Accredited by NBA, NAAC, New Delhi.

SIR M. VISVESVARAYA INSTITUTE OF TECHNOLOGY
BENGALURU - 562157

PROGRAMME OUTCOMES

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems using appropriate concepts, principles and standards of the discipline.
3. Design/Development of solutions: Design solutions for complex engineering problems and design system components or subsystems that meet specified requirements with appropriate consideration for the public health, safety, and cultural, social, and environmental constraints.
4. Conduct investigations for complex problems: Use research methodology and research methods to identify and solve complex engineering problems and design of complex systems.
5. Modern tool usage: Create, select, and apply suitable software and modern engineering and IT tools (including appropriate techniques, resources, and modern engineering and IT tools) including appropriate techniques, resources, and modern engineering and IT tools (including appropriate techniques, resources, and modern engineering and IT tools) including appropriate techniques, resources, and modern engineering and IT tools.
6. The Engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and ethical issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and commitment to the environment and sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multi-disciplinary settings.
10. Communication: Communicate effectively on complex engineering problems in the form of reports, presentations, and design documentation, make effective presentations, and give and receive clear instructions and management procedures and apply them to one's own work, as a member and leader in a team.
11. Project management and finance: Demonstrate knowledge and understanding of the Engineering management practices and apply them to one's own work, as a member and leader in a team.
12. Life - long learning: Recognize the need for, and have the preparation and ability to engage in continuing and self-motivated learning.

SIR M. VISVESVARAYA INSTITUTE OF TECHNOLOGY
Approved by AICTE, New Delhi. Affiliated to VTU, Bangalore. ISO 9001:2008 Certified
Kubastewarpet, Bengaluru - 562157

INSTITUTE VISION

- To be a center of excellence in Technical and Management Education concurrently focusing on disciplines and integrated development of personality through quality education, sports, cultural and co-curricular activities.
- To promote transformation of students into better human beings, responsible citizens and competent professionals to carry on a valuable resource for industry, work environment and society.

INSTITUTE MISSION

- To impart quality technical education, provide state-of-art facilities, achieve high quality in teaching learning and research and encourage extra and co-curricular activities.
- To stimulate in students a spirit of inquiry and desire to gain knowledge and skills to meet the changing needs and demands for developing skills and socially committed.
- To provide opportunity and resources for developing professional and quality staff to upgrade their knowledge & skills and disseminate the same to students on a sustainable long term basis.
- To create an ambience and nurture conducive environment for dedicated and quality staff to upgrade their knowledge & skills and disseminate the same to students on a sustainable long term basis.
- To facilitate effective interaction with the industries, alumni and research institutions.
